ADULT EDUCATION PROGRAMS

The Board recognizes that education is a life-long process. Therefore, programs will be offered which meet the intellectual, social, vocational, and recreational needs of adults. It is the intent that the adult program will be self-supporting through tuition fees and any adult education state and federal reimbursement.

The Adult Continuing Education Program is offered to regular day students, as well as the evening students, residents and staff members and provides for a variety of community interest, ranging from arts and crafts to the academic areas.
